

Isaac joined Bousfields in November 2023 as an Urban Designer. Isaac holds a Master of Urban Design from the University of British Columbia as well as a Bachelor of Environmental Studies in Planning from the University of Waterloo with a specialization in Urban Design.

Prior to pursuing his Master of Urban Design, Isaac worked as an Urban Designer on several projects across the GTA at a private consulting firm in Toronto. Previously, Isaac worked in consulting-based roles at private architectural and transportation firms. Throughout his professional experiences, Isaac has worked on the conceptual design, analysis and development of large-scale residential, commercial and industrial projects across Canada.

Additionally, Isaac has international experience. Working at the Transportation and Design Research Institute at Southeast University in Nanjing, China, Isaac conducted analysis for the design of new highway and bridge projects across China.
